**INDUSTRIAL
STORAGE**

BOLT TOGETHER SILOS

When it comes to large commercial silos, our BTS Series is the perfect solution for storing any granular, dry product. Meridian's Bolt-Together Silos are heavy-duty and engineered to store materials with densities up to 115 lbs per cubic foot. Featuring a high-quality powder coating, these bins are ideal for corrosive products such as fertilizer or abrasive materials like sand.

With fewer, larger components, the Meridian BTS Series is easier to assemble in the field. All bolts are located on the exterior of the silo, with a superior connection system that ensures both ease of assembly and long-term durability.

Each silo is custom-designed to suit your site. Drive-thrus, staircases, and other configuration options are available.

FEATURES

- Engineer Designed for Sand up to 115 lbs./cu ft
- Various sizes up to 67,990 cubic feet
- 10 Year Structural Warranty
- Powder Coat Finish

Industries/Application Served

- Mining/Minerals
- Fertilizer
- Frac Sand
- Grain
- Cement

Options

- Catwalks
- Spiral Staircases
- Drive-Trus
